† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.

**The risk descriptions and ratings provided are intended as a guide only and should not be relied on in isolation to make investment decisions. Risk ratings are calculated and provided by a third party and are not a recommendation by Zurich as to the suitability of a fund for investment. For more details on risk ratings please refer to our investment brochure.

Fund objective

The Euro Adventurous fund aims to provide the potential for long-term growth and the risk profile of this investment choice is the highest of the five managed funds. The exposure to equities is generally higher than that of the other investment choices in the Managed range, with a lower exposure to money market instruments. The investment choice may also utilise fixed interest instruments in certain circumstances.

Fund information

This investment choice is a portfolio internally managed by Zurich on a discretionary basis. The investment policy is overseen by Columbia Threadneedle Investments according to investment mandates set and controlled by Zurich.

Fund commentary (as at 31/03/2025)

The fund invests in a range of global shares, focusing primarily on US and continental European markets. US shares struggled amid indications of moderating economic growth and concerns about the impact of fresh trade tariffs. We used this period of weakness to top up the allocation to US equities. Share markets in Europe performed much more strongly. Sentiment was boosted by an improvement in economic indicators and hopes that additional government spending could help support corporate earnings. We banked partial profits from this move during the quarter, trimming holdings in European shares. Smaller allocations are held in UK, Japanese and other global share markets. Global equity exposures were adjusted slightly as the outlook evolved.
